

AMCS Colouring Book

While you're staying safe indoors, let's go for a dive into the beautiful oceans around Australia. Come with us and explore the gorgeous corals of our Great Barrier Reef, the deep dark seamounts in our cool southern seas, and meet the ocean's largest fish! **Let's go!**

Colouring In Activity

Colour in the underwater playground and marine life!

DID YOU KNOW

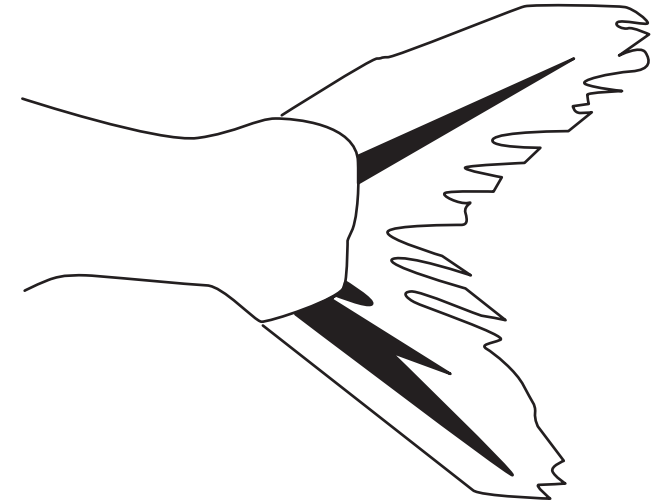

that the Great Barrier Reef is the largest living structure in the world? It's so big that you can see it from space! It is home to over 1500 species of fish. One fish that divers love to swim with is the mighty Maori Wrasse which eats sea urchins, crabs and molluscs and has even been seen eating crown of thorns starfish.

Find-A-Word

Can you find all of the marine life? Circle all the words you find!

1. Sea turtle
2. Clownfish
3. Shark
4. Reef
5. Dolphin
6. Whale
7. Coral
8. Ocean
9. Stingray
10. Seahorse

Draw an Orange Roughy!

What do you think a one-hundred-year-old fish would look like?
Draw a picture and share it on our Facebook page!
You might even go in the draw to win a prize!

4 Draw Orange Roughy

DID YOU KNOW

The Orange Roughy is a very special fish. It is a very old fish which can live up to 150 years! That's longer than people! The Orange Roughy lives on underwater mountains. Not many fish live to be that old so we have to make sure they are protected - and not caught in the nets of big fishing boats.

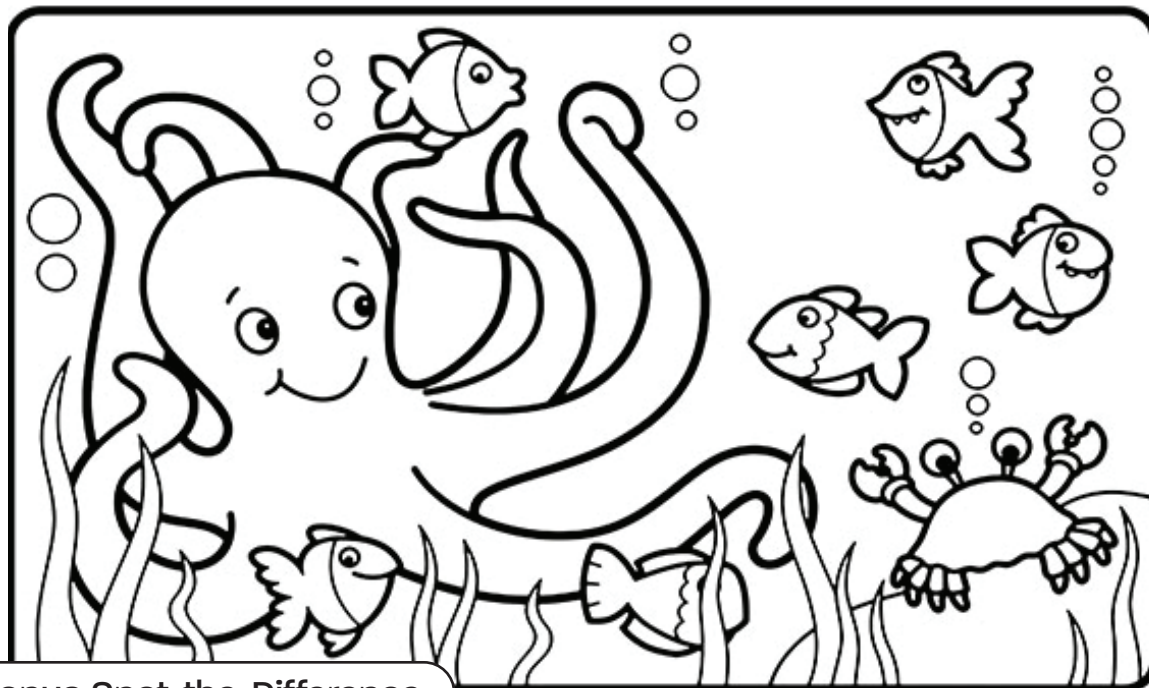

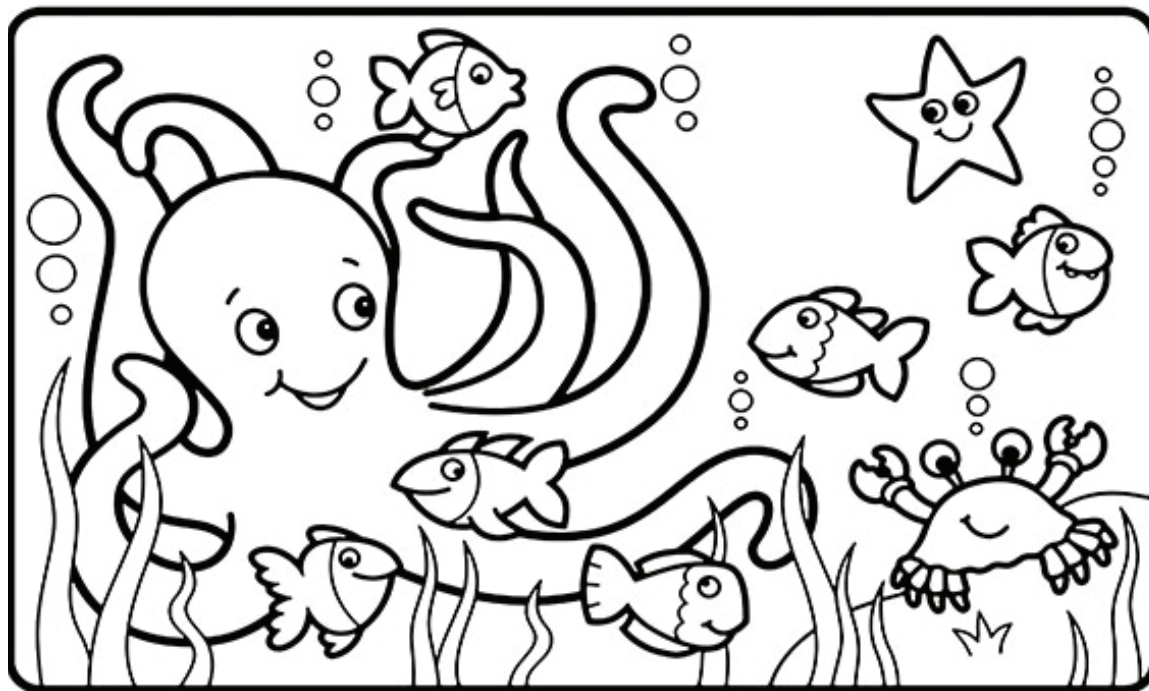

Numbers Game

Connect the dots to find our friends and turn two whales into a pod!

DID YOU KNOW

that whales used to be hunted for their oil and flesh until people stood together to save them? Groups like AMCS played a big part in helping our wonderful whales stay safe from harpoons.

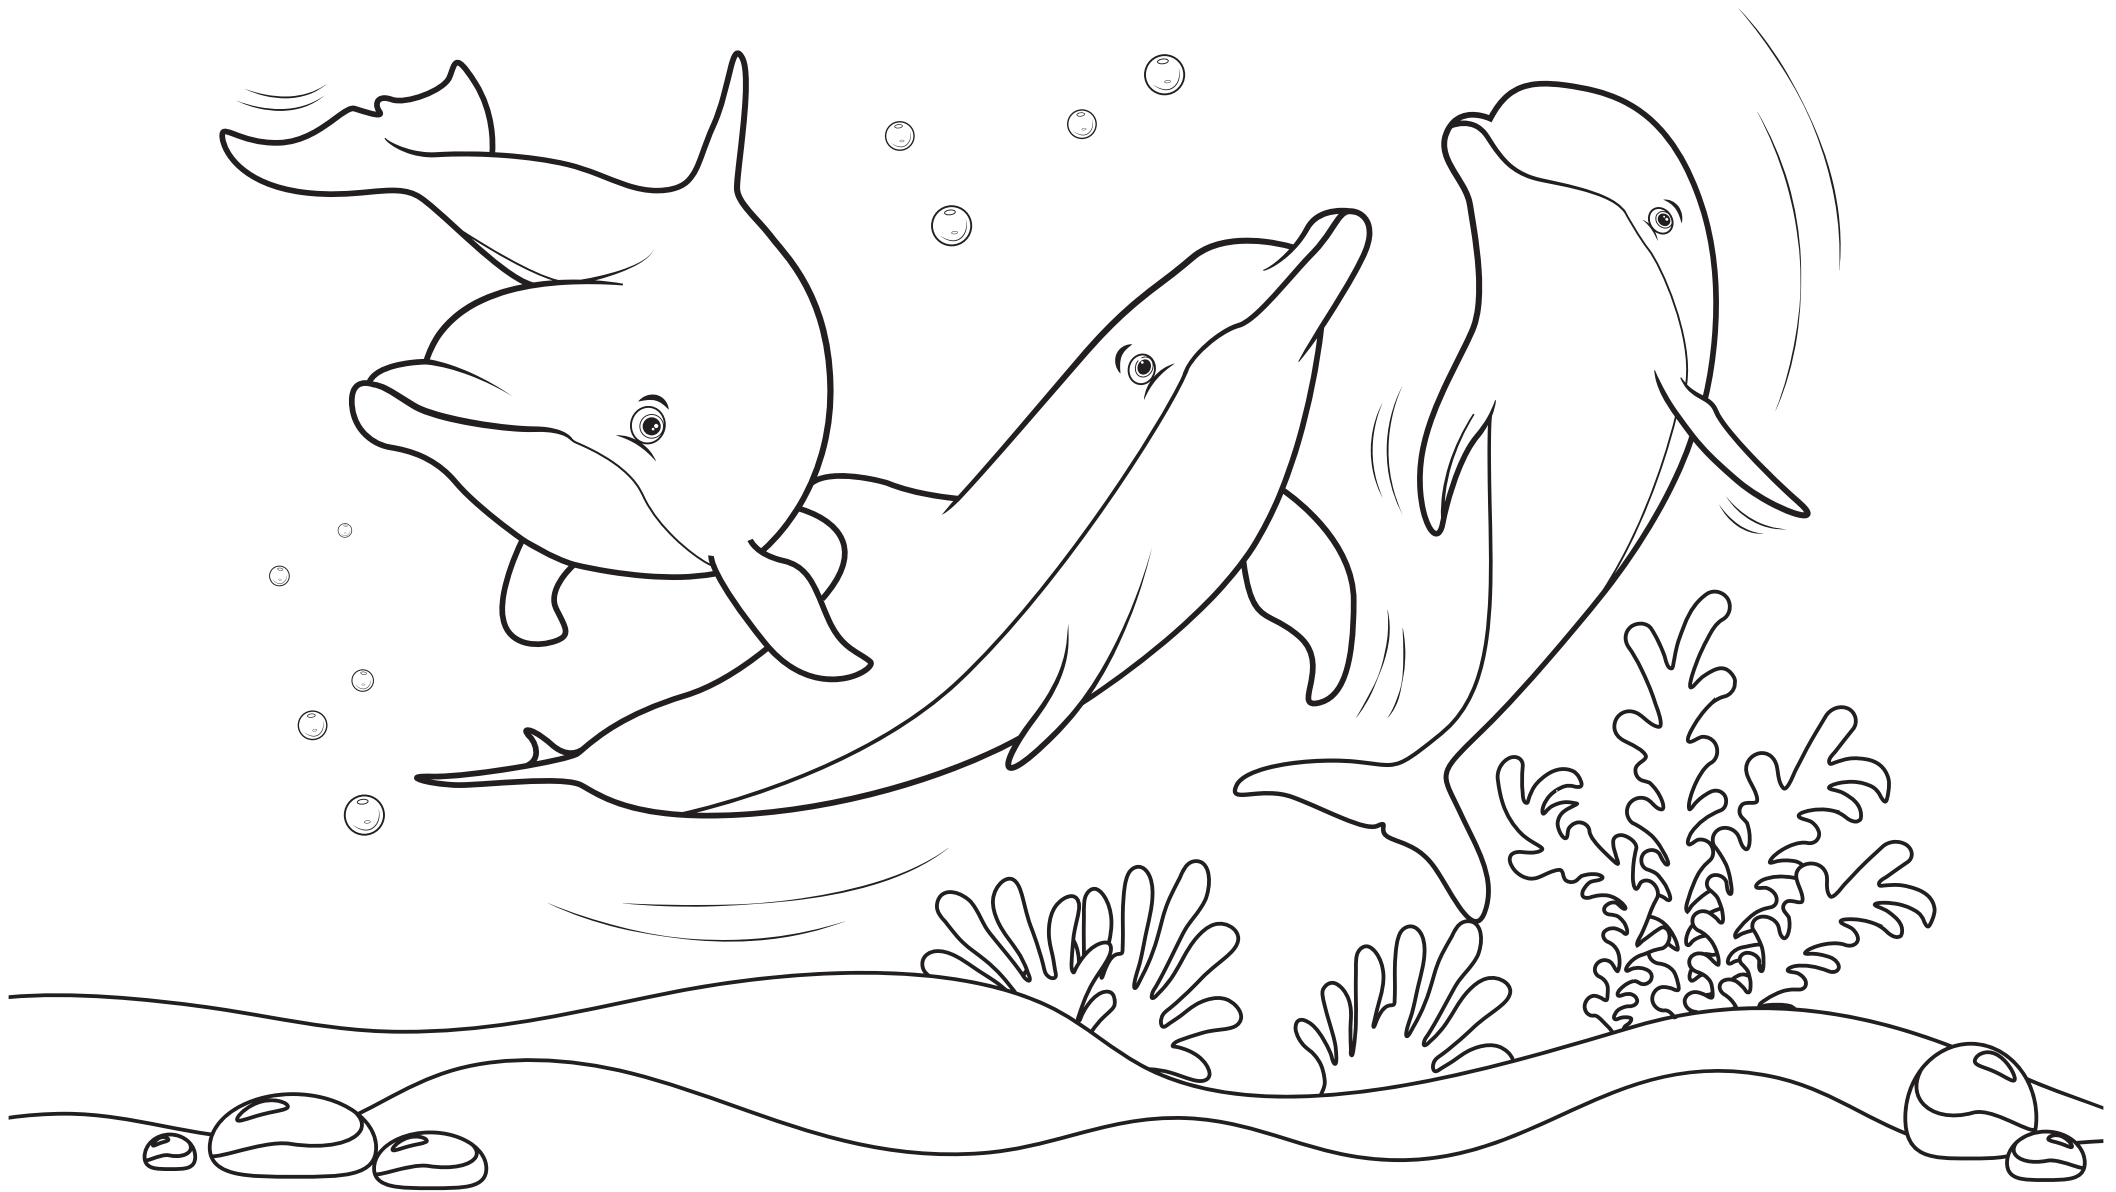

Spot the Difference

Can you spot all the differences between these two octopus gardens?

Circle the 10 differences you can see!

DID YOU KNOW

the Great Barrier Reef is made up of almost 3000 different coral reefs?

Colouring In Activity #2

Colour in our dolphin friends playing together!

7 Colouring in - Dolphins

DID YOU KNOW

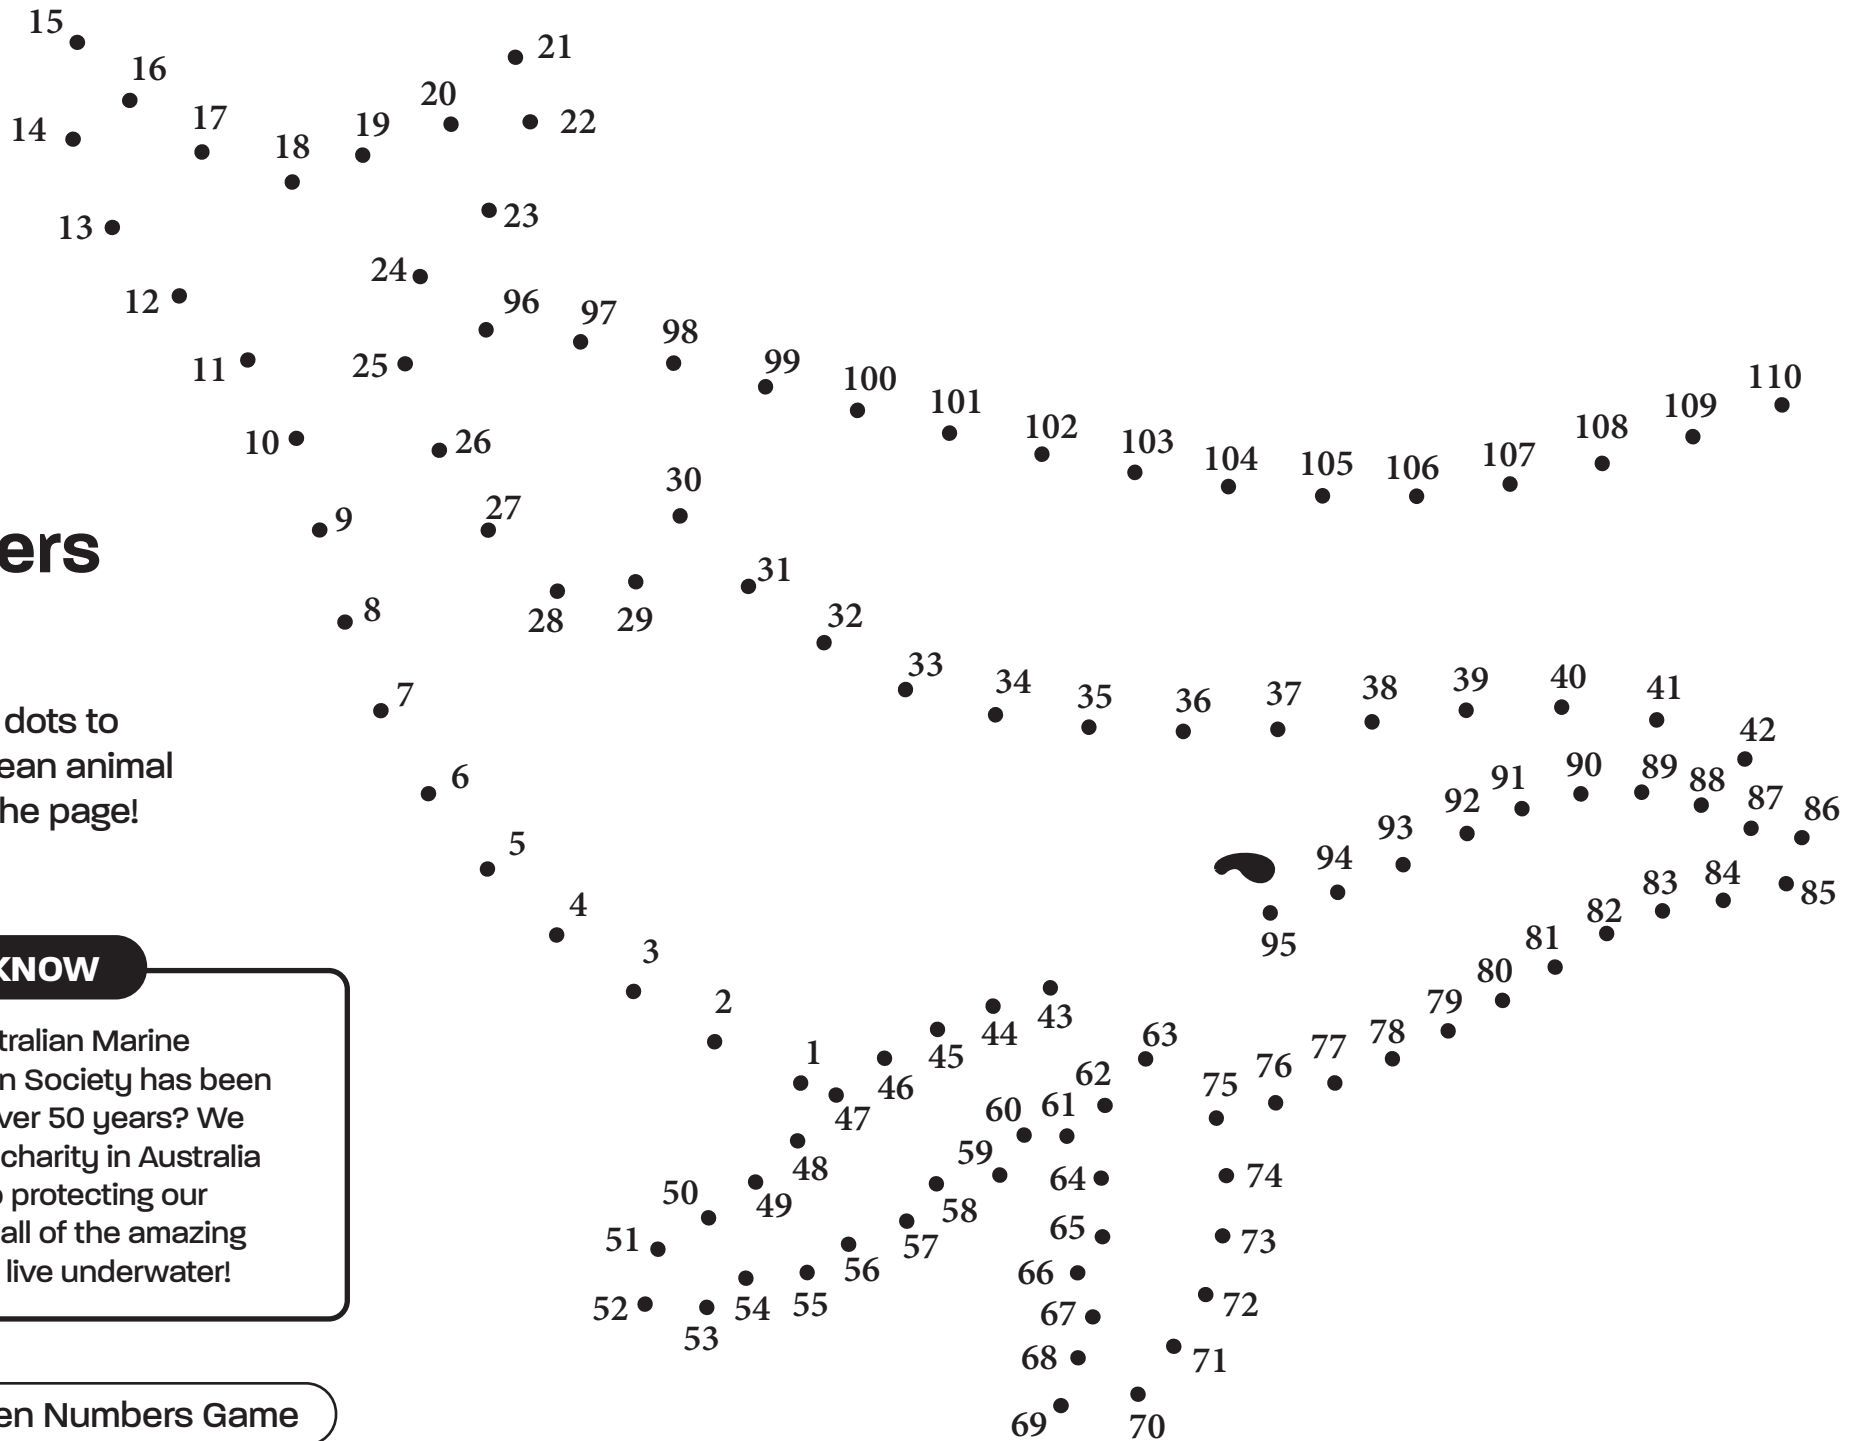

that dolphins are very clever animals, that like to play with their friends just like you and me? They catch fish together with their friends by working in a team!

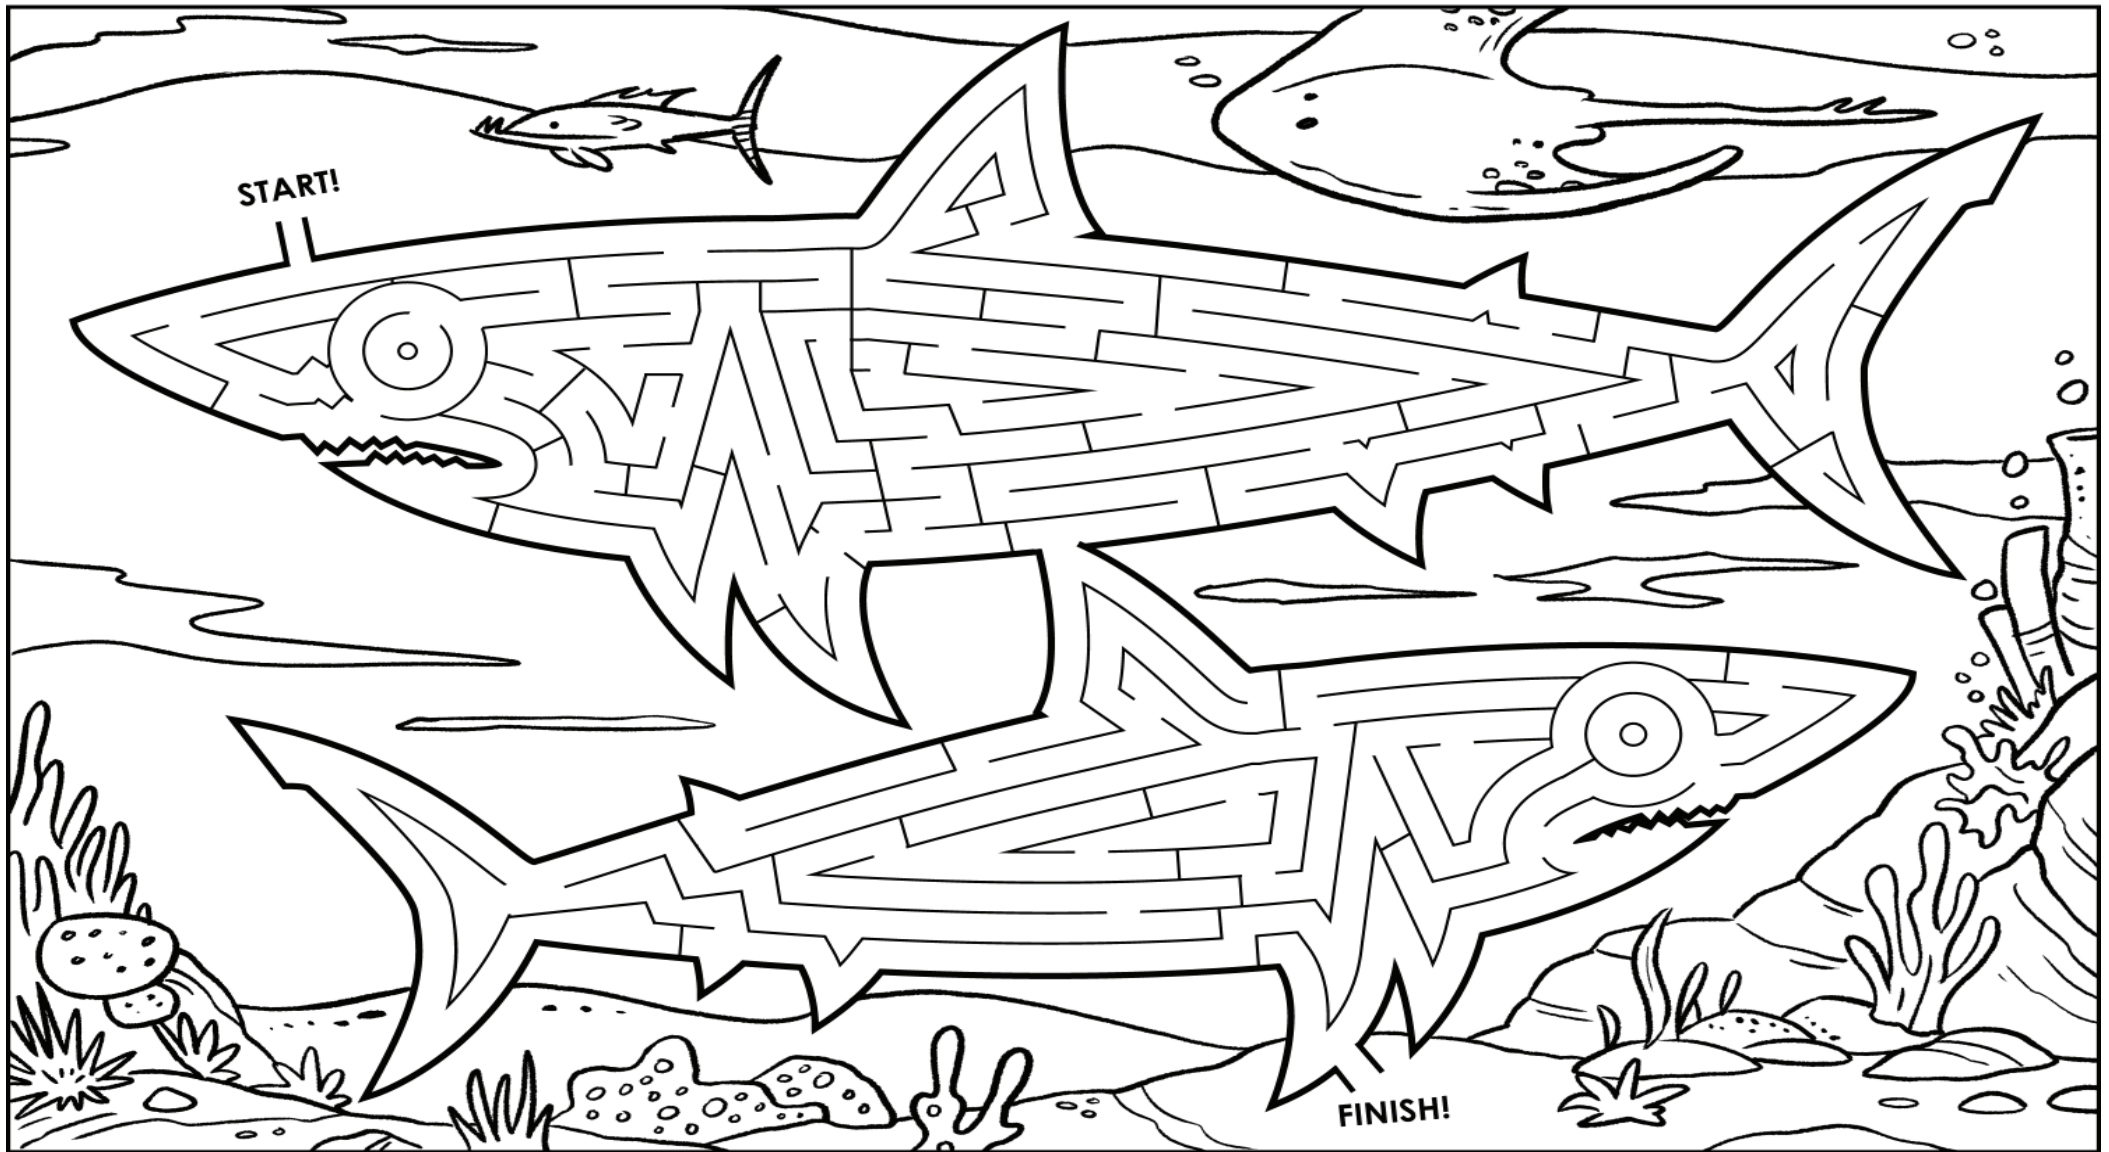

Numbers Game

Connect the dots to
see what ocean animal
is hiding on the page!

DID YOU KNOW

that the Australian Marine Conservation Society has been around for over 50 years? We are the only charity in Australia dedicated to protecting our oceans and all of the amazing animals that live underwater!

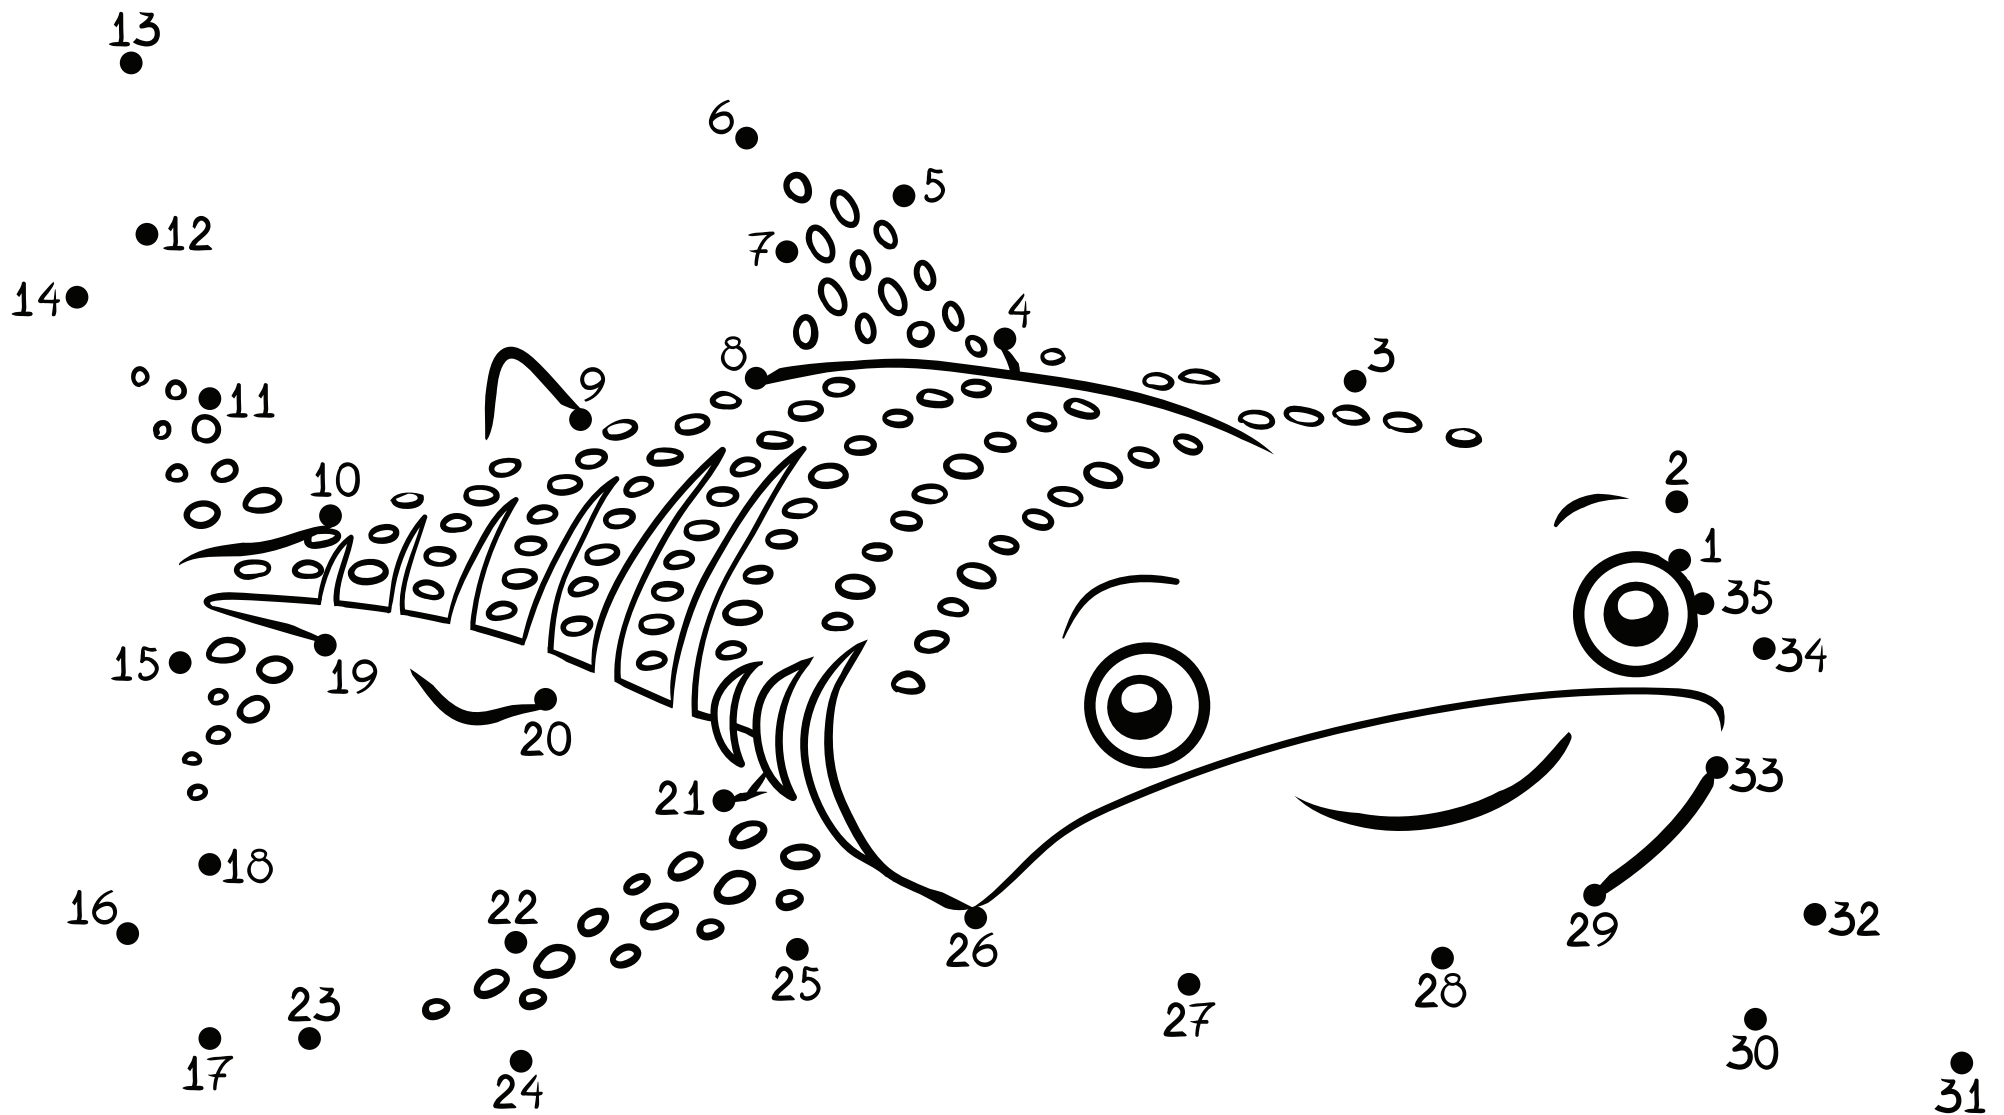

Shark Maze

Can you make your way through the sharks to the finish line?

DID YOU KNOW

Sharks are often misunderstood as being big, mean eating machines! Most sharks are actually very shy, and lots of them are threatened with extinction. This is not good, because sharks are very important for the health of our coral reefs and oceans.

Numbers Game

What do you think this is? Connect the dots to see what ocean animal is hiding on the page and then colour it in!

10 Children Numbers Game #2

DID YOU KNOW

that whale sharks are the world's largest fish! They are big gentle giants that eat their food by filtering tiny creatures through their gills, like plankton, small fish and squid.

Colouring In Activity #3

Colour all of the ocean
animals in!

DID YOU KNOW

Our oceans are very special and they need you and me to protect them. They are the home for many animals like dolphins, turtles, whales and sharks. All those animals need to play their own part to keep the sea healthy - so we need to make sure that they are all safe - which is why groups like AMCS exist.

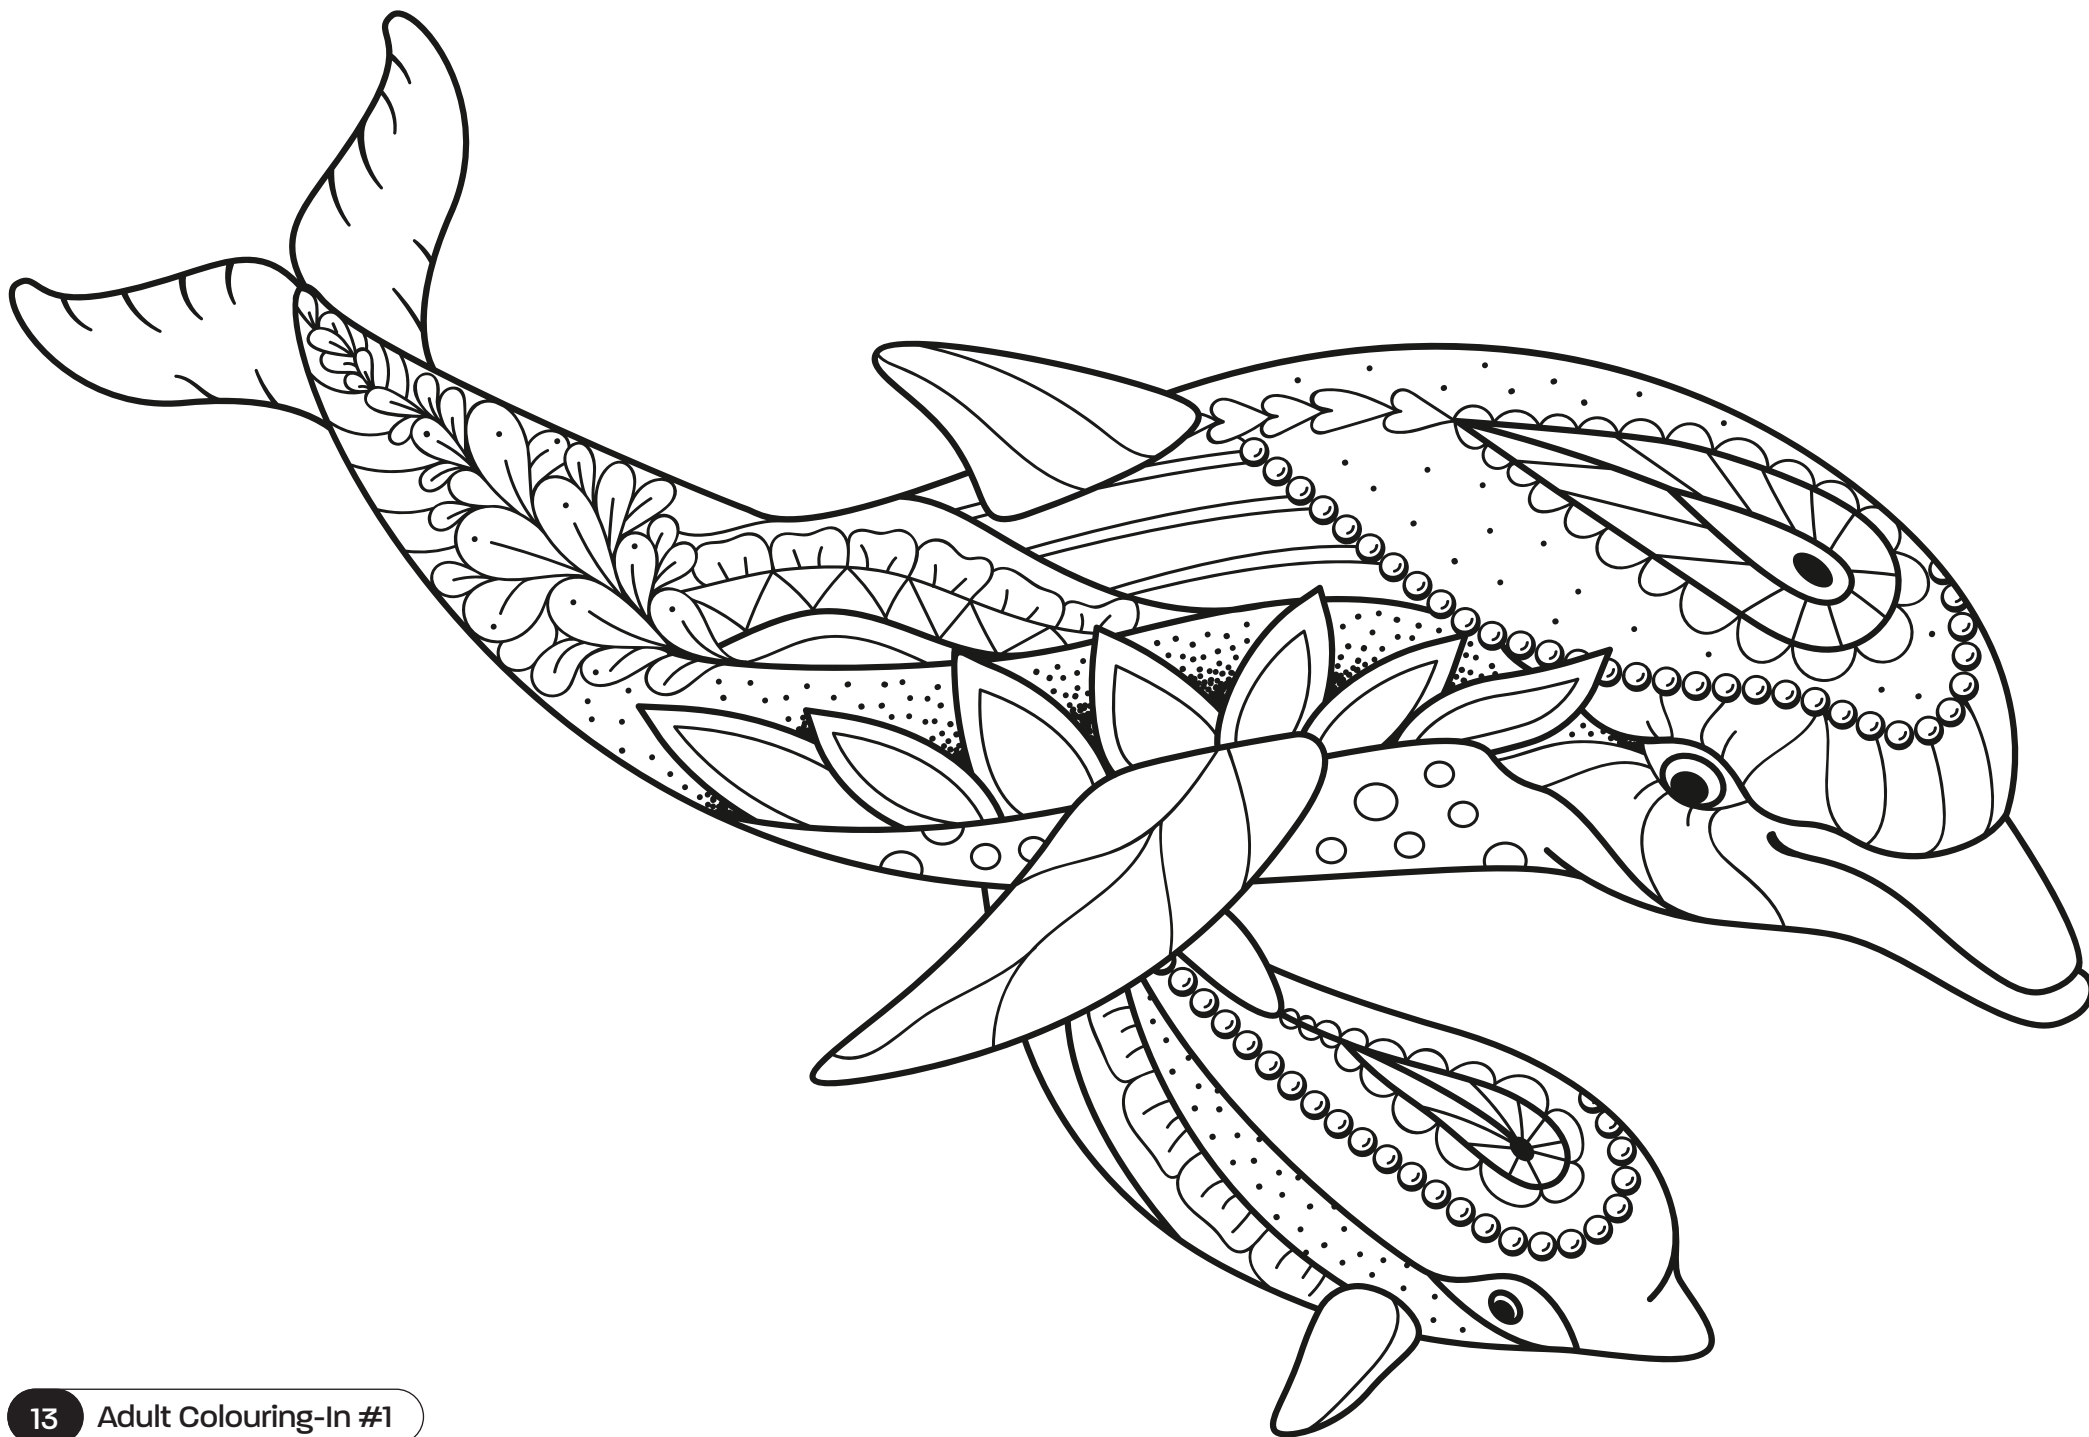

Adult Colouring Book

"With an extinction crisis and a climate emergency upon us, our oceans are vulnerable in ways almost inconceivable a generation ago. And it's clear that our corals, beaches, fish and marine mammals will not be saved if we assume governments and corporations will act swiftly and spontaneously to rescue them.

That's why the work of AMCS is critical. For over 50 years the nation's peak marine charity has worked to facilitate, encourage and shame the powers-that-be to do what needs to be done to keep our seas and shores alive.

Australia's oceans need advocates and guardians as never before, and no one does this work better than AMCS".

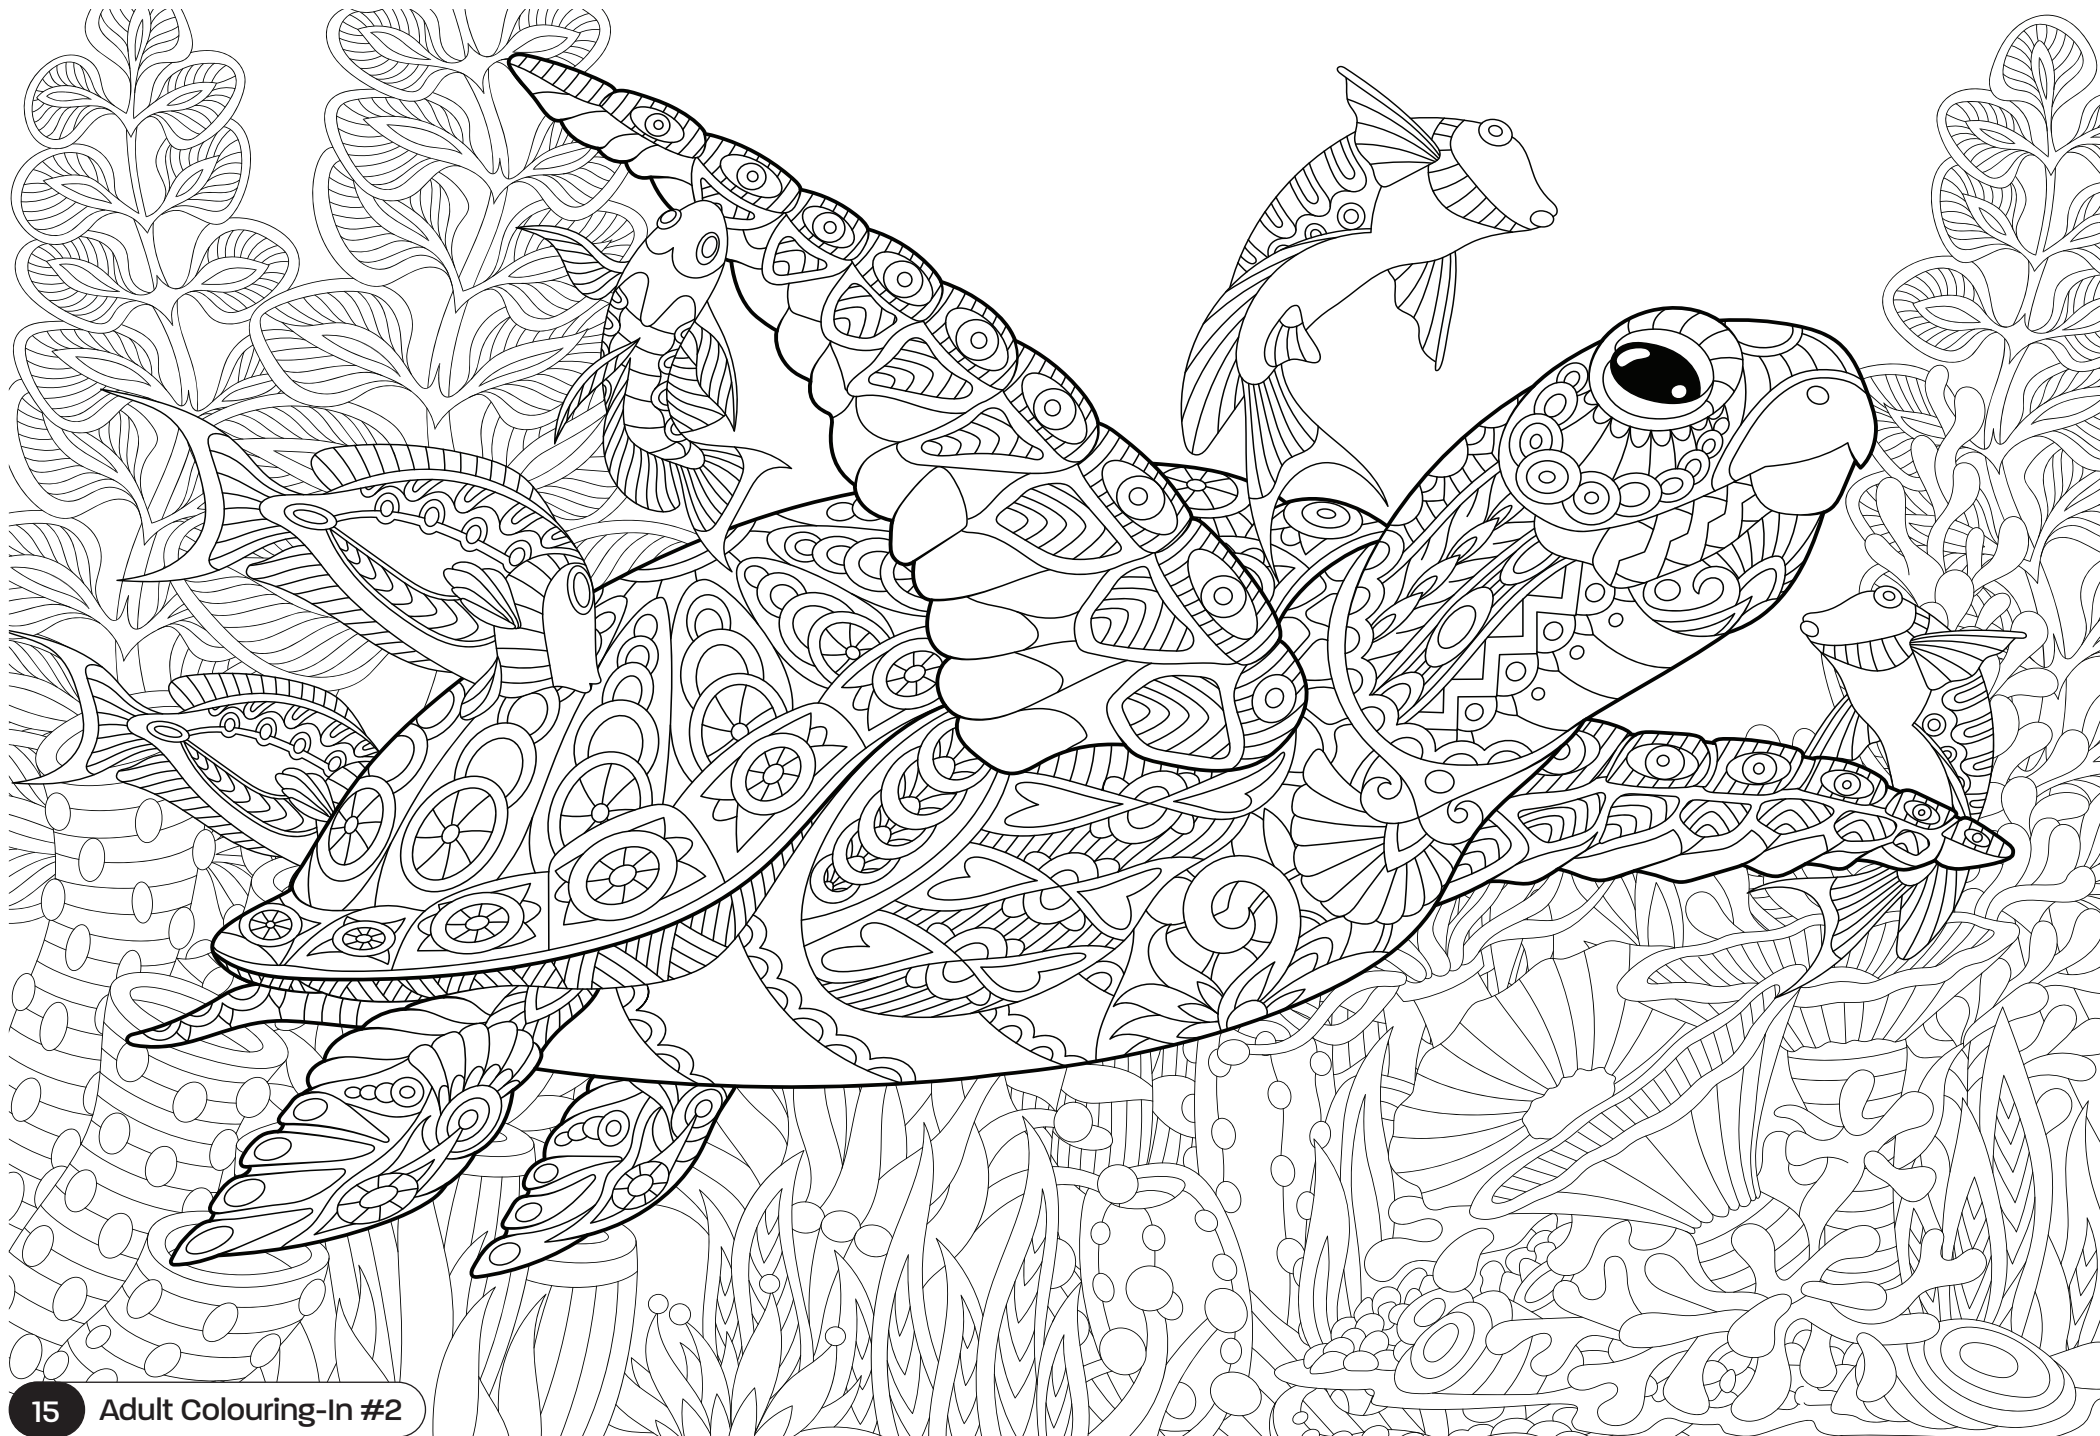

Tim Winton, AMCS Patron.

Find-A-Word

1. *Carcharias taurus*
(Grey Nurse Shark)
2. *Amphiprion ocellaris* (Clownfish)
3. *Rhincodon typus* (Whale Shark)
4. *Caretta caretta*
(Loggerhead Sea Turtle)
5. *Myliobatoidei* (Stingray)
6. *Cheilinus undulatus*
(Humphead Wrasse)
7. *Acropora cervicornis*
(Staghorn Coral)
8. *Plectropomus leopardus*
(Leopard Coral Grouper)
9. *Hippocampus bargibant*
(Pygmy Seahorse)
10. *Orcaella heinsohni*
(Snubfin Dolphin)

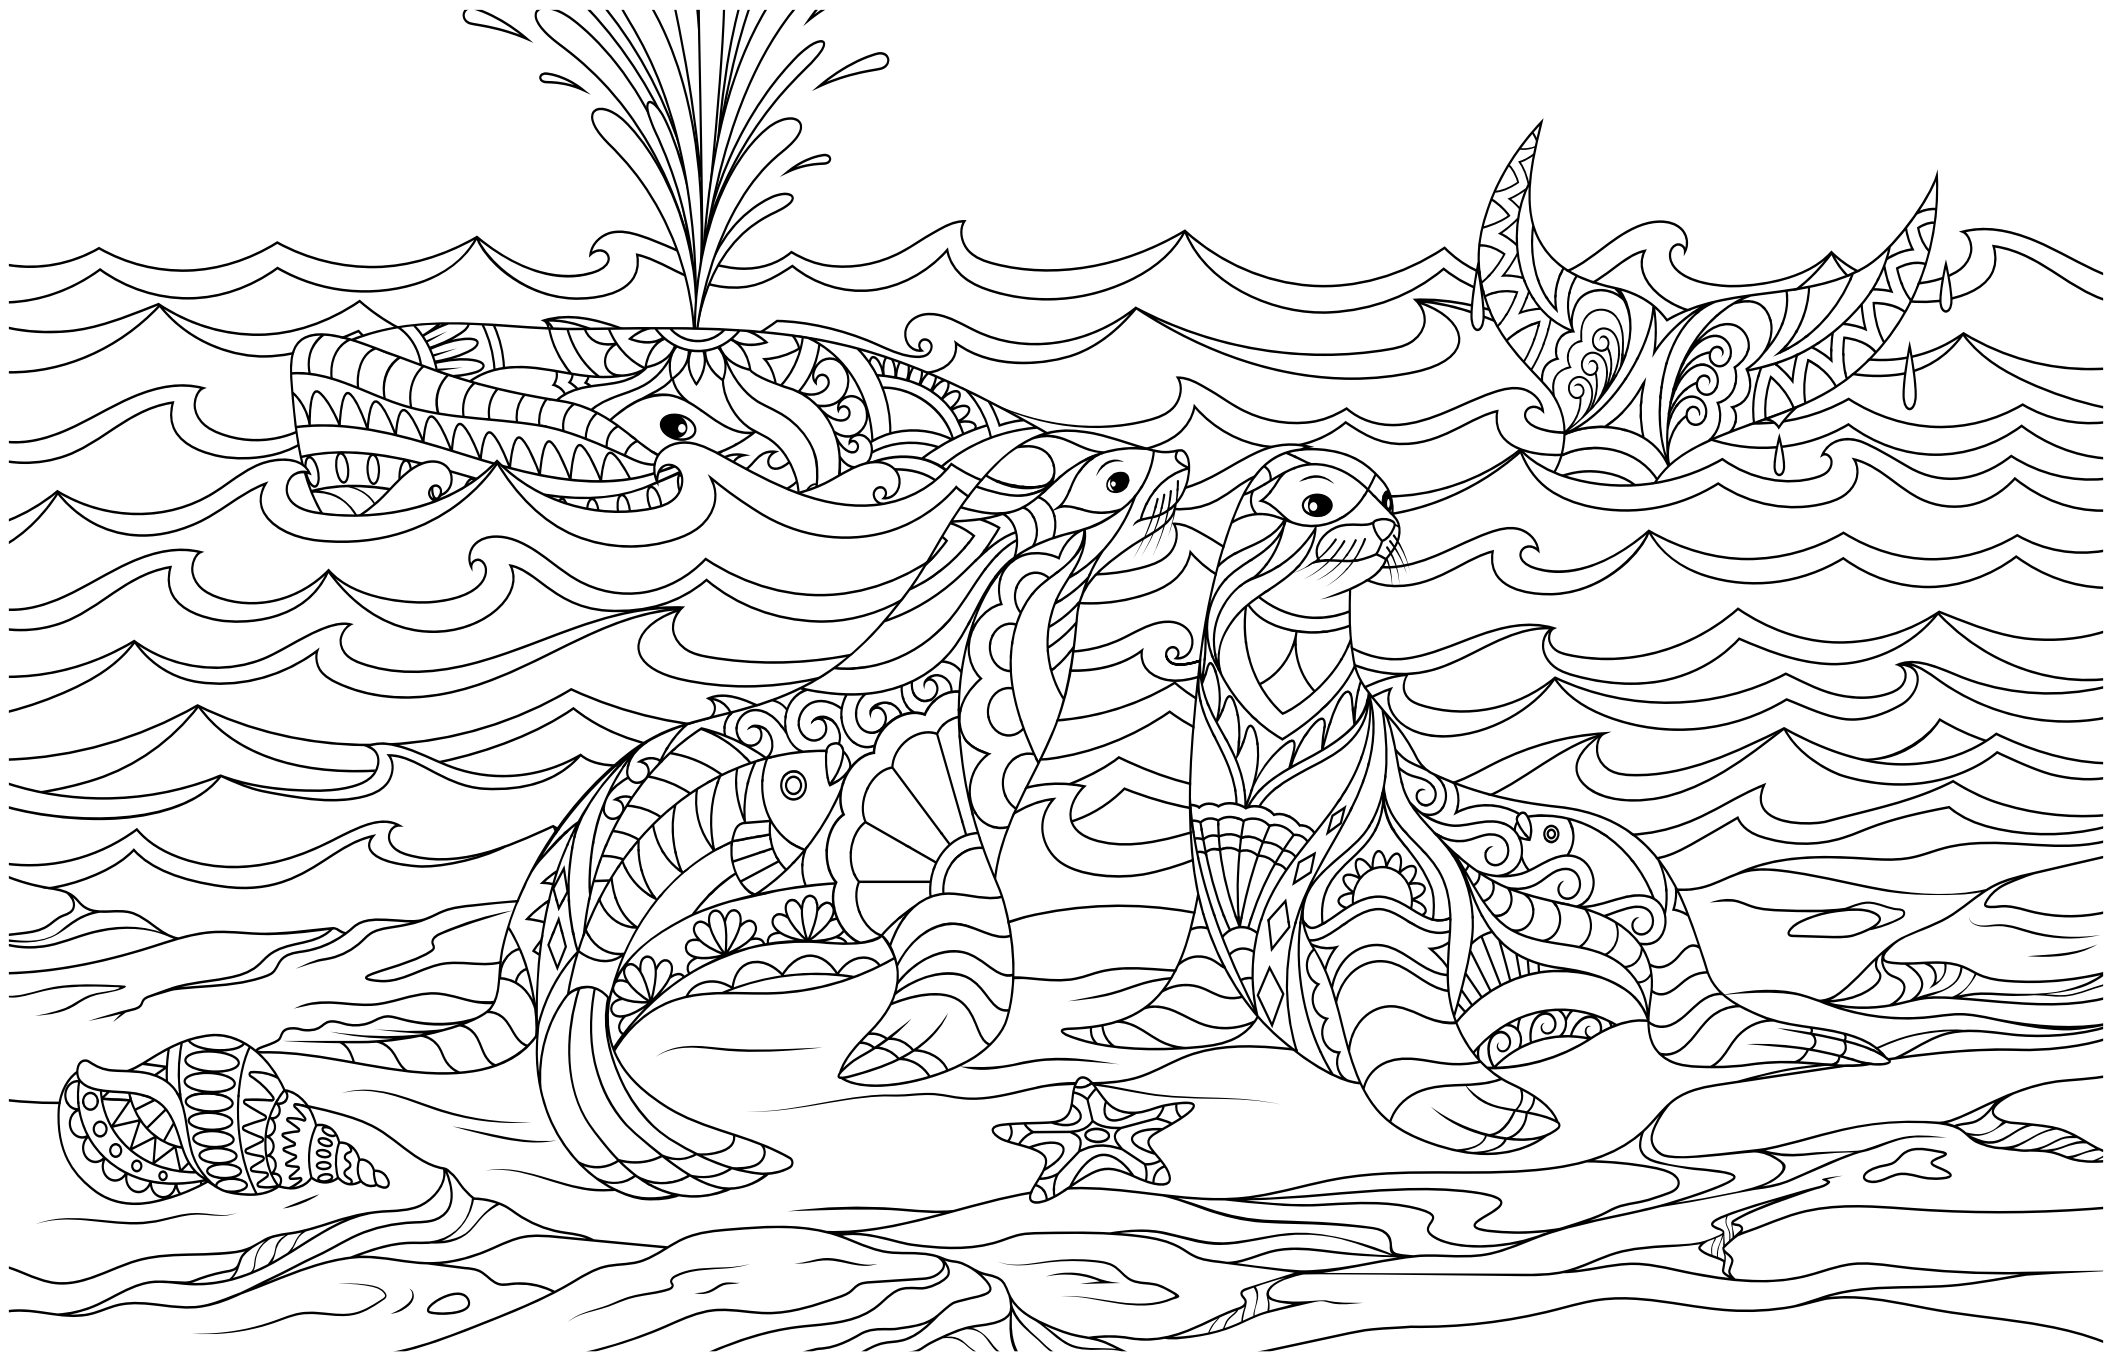

Where's Whaley?

Can you spot our AMCS Whale hiding in the ocean?

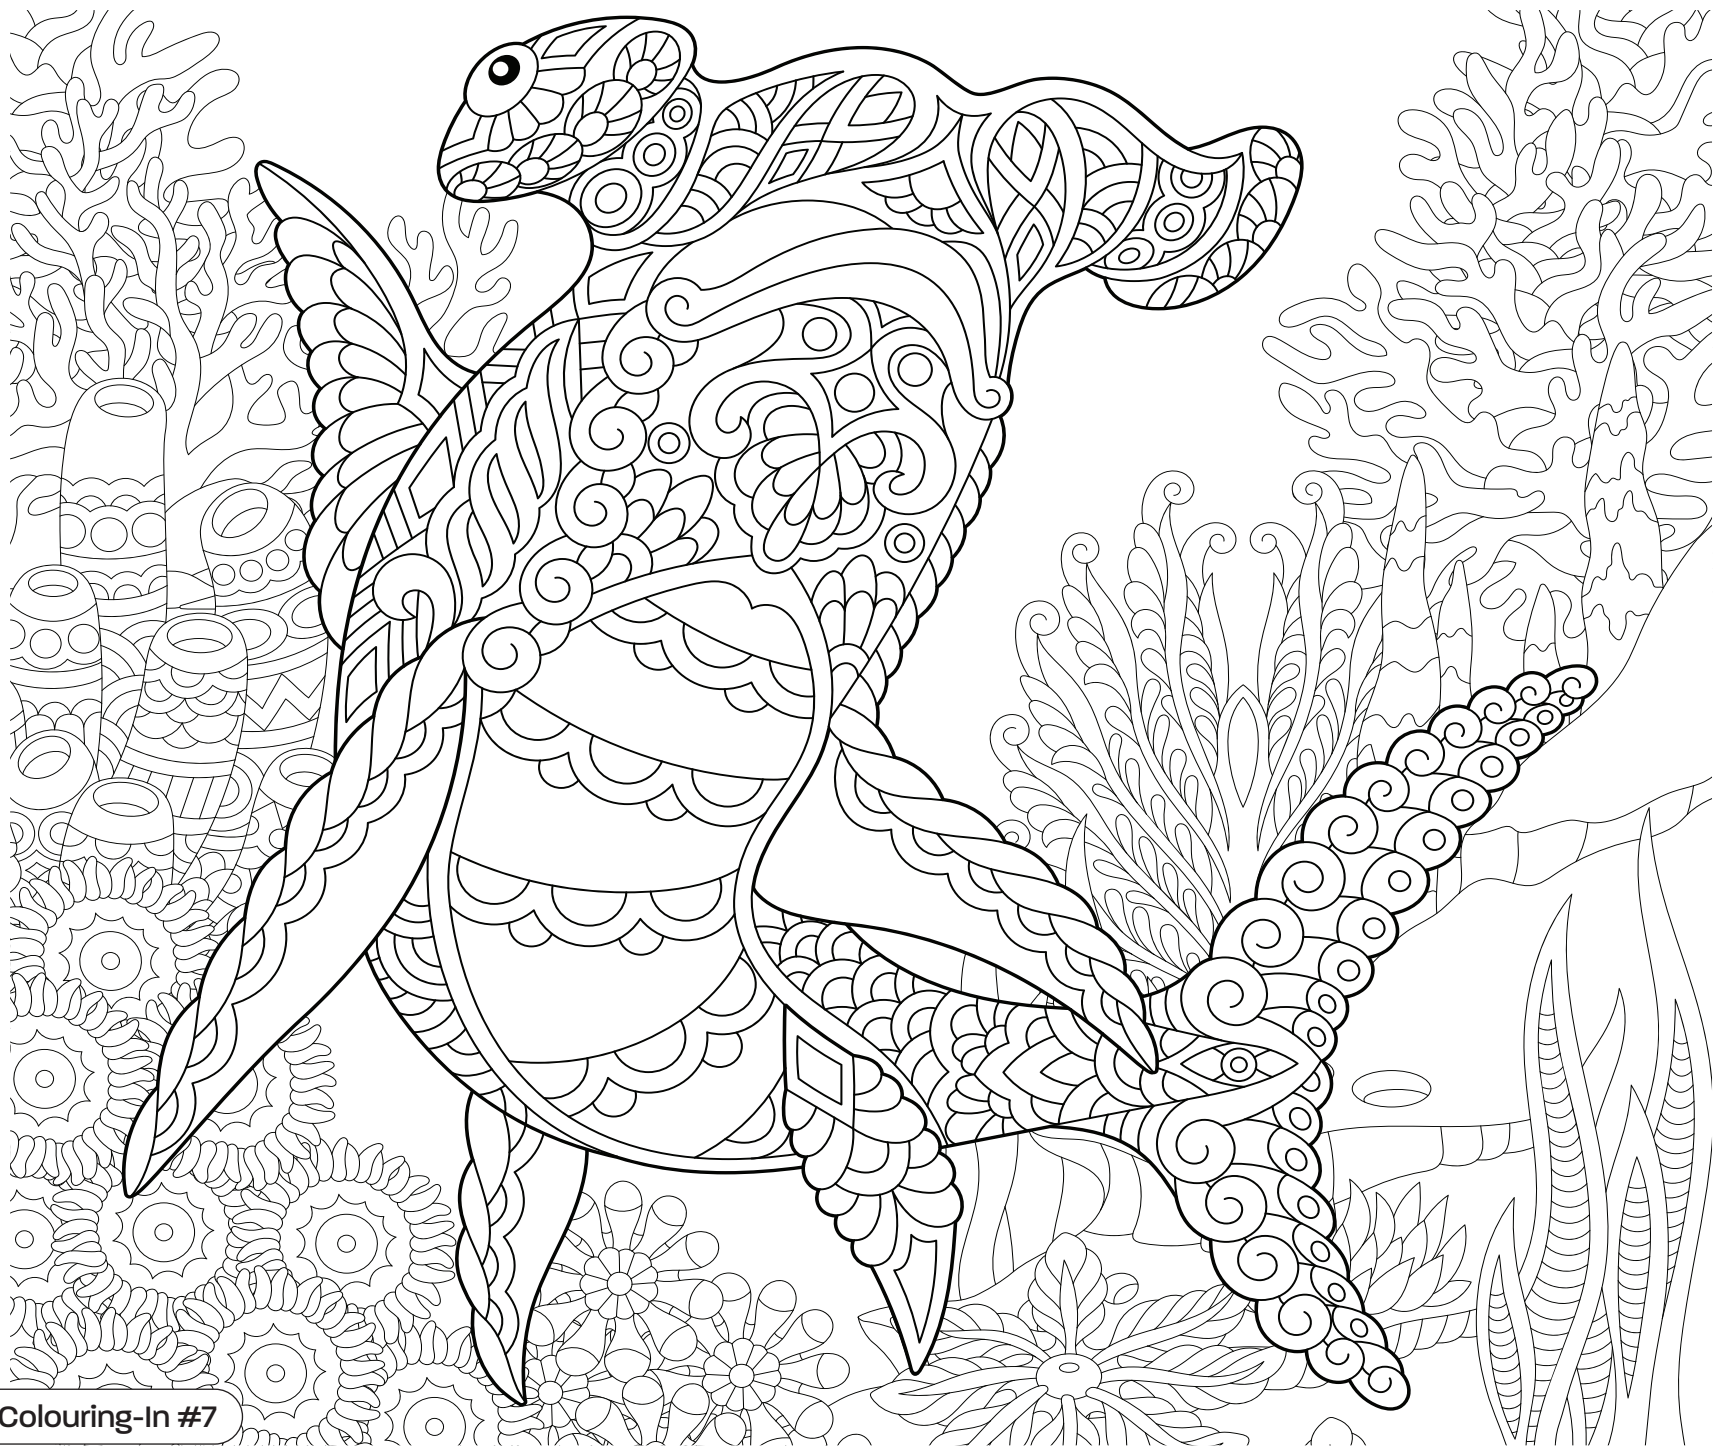

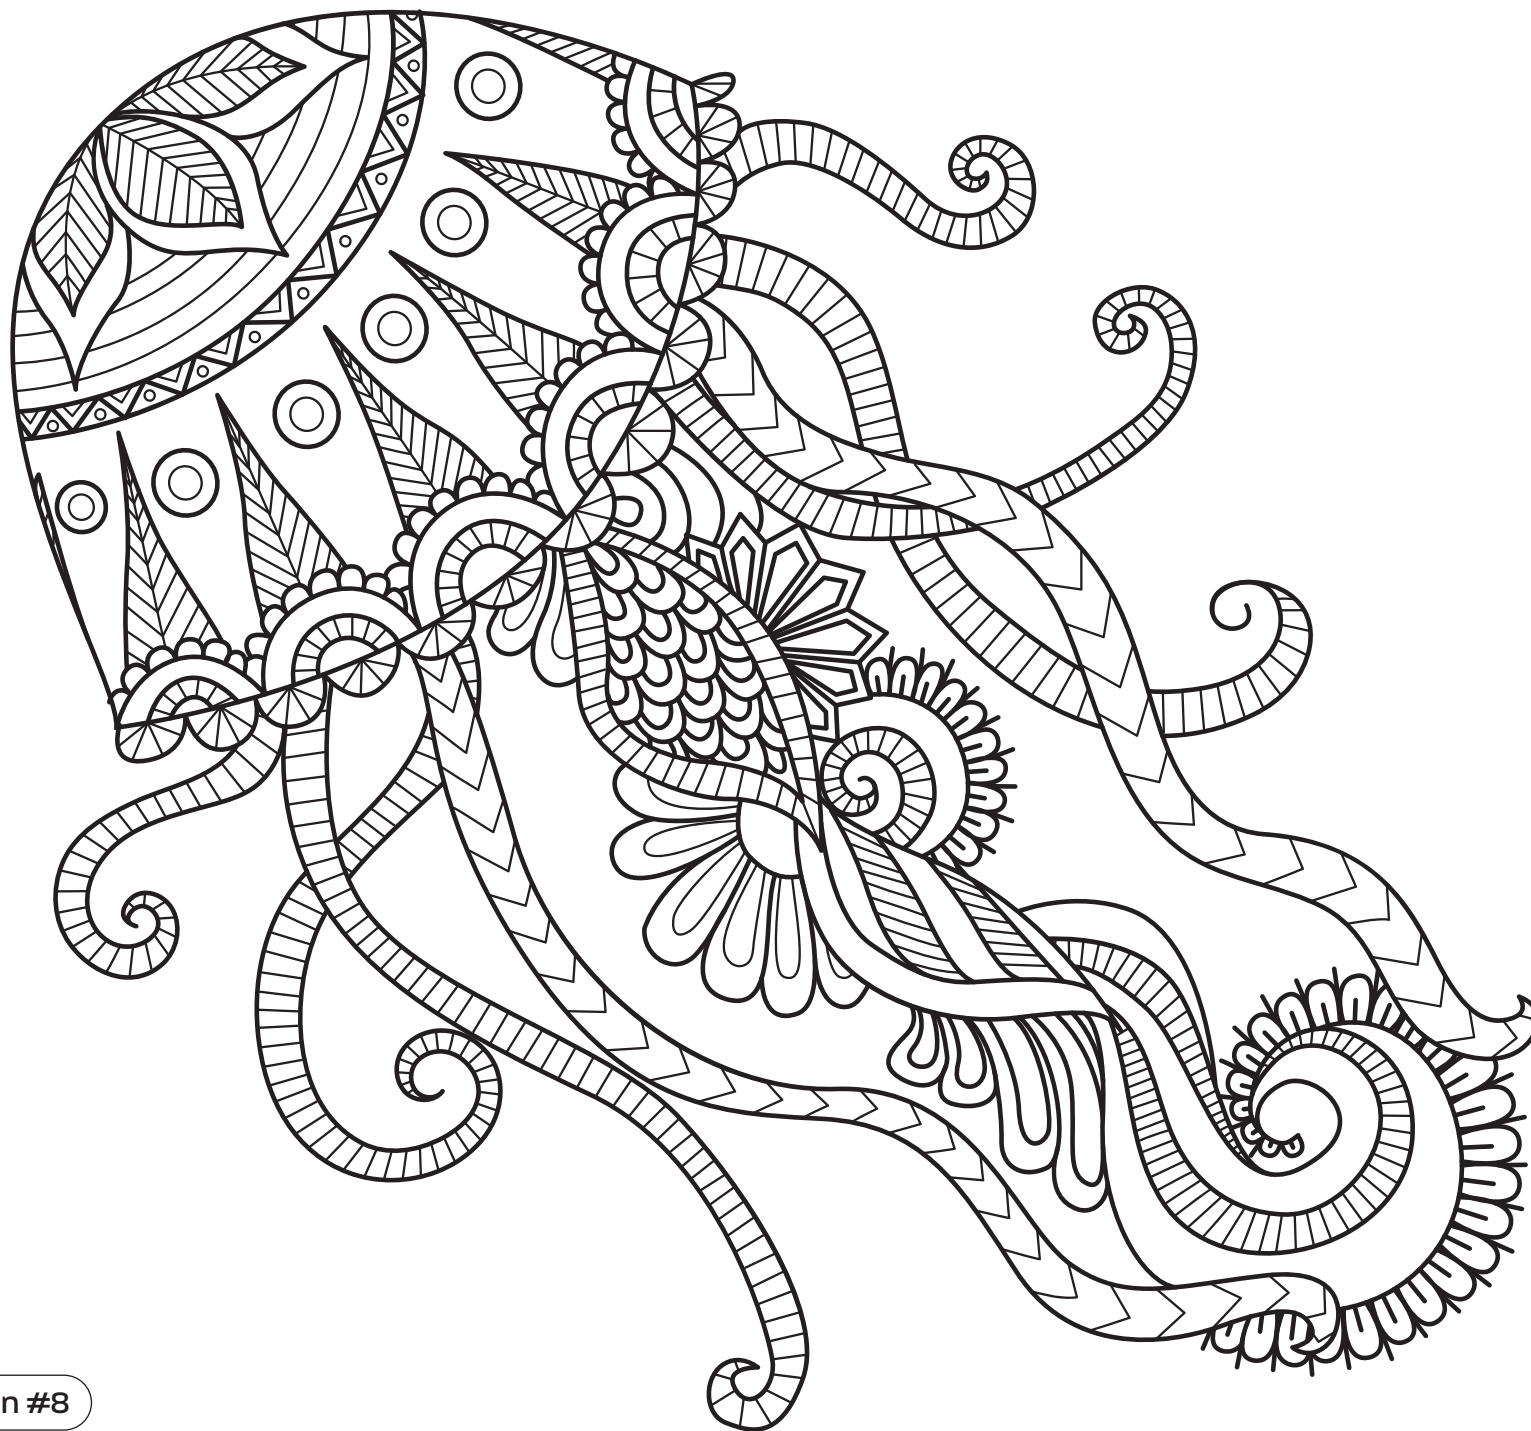

Just like our national parks on land, marine national parks provide protection for ocean wildlife and their homes. Our marine parks are safe havens for our threatened sea turtles, dolphins and whales. It is our great privilege, and our great responsibility, to manage them wisely and with the future in mind. AMCS has worked tirelessly for more than 50 years to establish marine parks to protect Australia's most special ocean places – including the Great Barrier Reef, which was previously unprotected.

If you'd like to help us protect our oceans and the incredible animals that call them home — please visit our website:

www.marineconservation.org.au

Australia's oceans
contain the richest,
most diverse life on Earth.
It is our honour and duty
to protect them for
generations to come.

We need your help

We hope you enjoyed this colouring-in book. We need your help to protect our beautiful and fragile oceans. Donate today to save our seas for generations to come.
