

Let's protect our **GREATEST** asset

The Great Barrier Reef is vital to the Far North Queensland economy and way of life. It supports thousands of jobs, tourism, fisheries, and is part of our shared cultural heritage.

With the Reef under threat from climate change, pollution, and unsustainable fishing practices, the federal election is our chance to demand real action for the future of the Great Barrier Reef.

Let's show decision makers that Far North Queenslanders want strong action to protect the Reef!

Political decisions made over the next three years will profoundly shape the Reef's future.

Send a clear message to Leichhardt candidates that Reef protection must be a high priority.

Sign our letter – urge candidates to publicly commit to:

-  Cut climate pollution by 90% by 2035, approve no new fossil fuel projects and rapidly transition to renewable energy
-  Cut water pollution, restore wetlands and stop deforestation in reef catchments, especially along rivers and creeks
-  Phase out coral harvesting for the aquarium trade and support the industry to transition to aquaculture.
-  Develop a reef emergency response plan to deal with major events like mass bleaching, cyclones and floods.
